

# FIL BULLETIN

No. 73

Dear friends of our sport,

On July 23, 2020, the FIL Executive Board met via video conference. The focus of this Executive Board meeting was on the current developments around the COVID-19 crisis and, in connection with this, also some relevant important resolutions and recommendations. I would like to bring these to your attention here in this FIL Bulletin.

During the past weeks, our FIL directors Artificial Track (Maria Luise Rainer, Christian Eigentler) and myself have conducted several video conferences with all event organizers of 2020/21 FIL events for the general class artificial track. All in all, the following conclusions have been drawn on the basis of COVID-19 with regard to the staging of the planned FIL artificial track luge events in the coming season:

- **It will only be possible to hold the races on artificial tracks according to plan with significant restrictions:**
  - o Determination of a maximum number of sleds per FIL competition
  - o Reduction in training runs
  - o Reduction in the number of assigned judges
  - o Reduction in the team captains' meetings
  - o No other gatherings or meetings
  - o From today's point of view, no spectators admitted to the races
  - o No accompanying program or other activities during the race week

**During and also after this meeting, the Executive Board dealt very intensively with our directors' proposals and approved the documents "Athletic Procedures of the FIL World Cup Series for the 2020/2021 Season" and "FIL Protection and Hygiene Concept for World Cup Events" as found in **enclosures 1 and 2.****

**VP Thomas Schwab deserves special thanks for the development of this hygiene concept.**

**The Executive Board will decide on further amendments to the 2020 IRO if they become urgently necessary due to COVID-19. This is valid for the 2020/21 season.**

**All approved measures have the same goal:**

- to keep the entire luge entourage (athletes, assistants, officials, volunteers, TV crews, etc.) free of COVID-19. Only in the way, will we be able to secure the coming racing season to the highest possible degree!

**For this purpose, the 100% support and implementation of these decided measures by each individual is indispensable.** As mentioned earlier, we are aware that these restrictions in part are very drastic.

Another issue is **travel restrictions, which apply to some countries due to COVID-19.** These can change at very short notice - we at the FIL are trying to keep a current overview as far as possible and to support you as best we can in order to be able to participate in the FIL competitions with your national teams.

**In this context, we would like to instruct you that at present, NO binding travel arrangements (fixed bookings) for the participation in FIL events are to be made. This applies especially to the planned 2020/21 FIL competitions in North America and Asia.**

The Executive Board has named Executive Board member **D. Bell the COVID-19 Coordinator North America / Asia** with the goal of working for the FIL concerning **the lifting of the travel restrictions to North America and Korea.**

Together with the directors, the Executive Board has **set the deadline of September 15, 2020 to decide if the scheduled races in the general class artificial track are able to be carried out in North America and also PyeongChang.** This also applies to the 50<sup>th</sup> FIL World Championships in Whistler/CAN.

Therefore, **it is possible that changes will be made to the events schedule artificial track general class after September 15, 2020.**

The International Training Week as well as the Olympic test competition (World Cup) on the newly built track in Yanqing/CHN should take place as planned from today's point of view. However, the participation restrictions (maximum number of sleds) according to enclosure 1 will apply here as well.

**For Junior / Youth A artificial track, the executive board has decided to stage 4 competitions in Europe and 4 competitions in North America.** The conditions of participation can be found in enclosure 1. **A revised race calendar will be sent out soon.**  
The **2021 Junior WCh in Winterberg /GER should take place as planned.**

As already mentioned in FIL Bulletin No. 72 of June 2020, **the FIL has again provided a budget for travel subsidies to the NFs for participation in various FIL competitions. We will provide you with the details at the end of September / beginning of October, depending on the race calendars updated or confirmed on the basis of COVID-19.**

**On behalf of the Executive Board, I would like to inform you of the following:**

The **updated 2020/21 events schedule natural track** was approved (**enclosure 3**).

Regarding COVID-19 and FIL events on natural track, you will receive separate information in a timely manner.

At the request of Th. Schwab, VP Marketing, the Executive Board approved **an expansion of allowed advertising possibilities in IRO §7 2.4** (**enclosure 4**).

An **amendment concerning the 2022 Olympic Qualification Criteria for the doubles competition** was adopted (**enclosure 5**). This concerns NFs who want to participate in the qualification procedure for the 2022 OWG in Beijing/CHN with women's doubles.

**Other important information:**

**- FIL Congress November 20-21, 2020 in Berchtesgaden/GER**

Currently the number of participants is limited to 200 people due to COVID-19. Therefore, **now 2 (previously 1) delegates per NF can participate in the FIL Congress.**

We ask you to please register at <https://registration.dokume.net/> by **September 15, 2020. This also applies for those who already registered for the FIL Congress originally scheduled for June 2020.** A note for member federations, should they not have the possibility to participate in the FIL Congress due to COVID-19 travel restrictions to Germany: The FIL Congress will be transmitted as a livestream on the Internet, and an electronic, anonymous voting system will also be available. Further information will be provided in due course.

**- Pre-homologation Olympic Sliding Center in Yanqing/CHN**

The pre-homologation of the Olympic track in YanQing/CHN will now take place between October 23, 2020 and November 1, 2020. In excellent cooperation with BOCOG (Organizing Committee 2022 OWG) we have succeeded in being able to carry out this pre-homologation with international athletes and coaches.

Due to COVID-19, we have accepted restrictions (participation only for citizens from "Schengen countries" in Europe).

The FIL contingent is comprised of:

- 2 men singles
- 2 women singles
- 2 doubles pairs
- 4 international coaches
- 3 experts FIL Track Construction Commission
- Technical Director FIL

In addition, athletes from China and their international coaches will participate in this pre-homologation.

Despite the difficult circumstances, I would like to wish you a nice summer and your teams a good preparation time.

Come through this difficult time well and, above all, in good health.

Best regards,

A handwritten signature in black ink, appearing to read 'Schweiger', written in a cursive style.

Christoph Schweiger  
Executive Director

## Procedure for the FIL World Cup series for the 2020/2021 season

The health of our athletes, coaches, assistants, officials, members of the organization committee, and the volunteers is the highest priority of the International Luge Federation, FIL.

The following descriptions of the sport's procedures should make it possible to enter professional competition sport again as of November 27, 2020. For this purpose, the WG COVID-19 would like to propose the following adjustments of the 2020 IRO 2020.

### **I. FIL Competitions in the General Class**

- Changes to the FIL events schedule as of June 5, 2020 are possible.
- It is possible to adapt the disciplines to the requirements and situation.

#### **a. Eligibility to participate per NF at FIL events**

Quotas for eligibility to participate in the World Cup per NF. (enclosure 1a status June 28, 2020)

- Registration for the 2020 / 2021 FIL World Cup (online registration) must be completed by October 31, 2020.
- If the number of participants at a World Cup event is less than 120 sleds, it is up to the FIL Sport Director and the Technical Director to fill in the missing quota places by means of an individual decision.

Eligibility to participate per NF at the 50<sup>th</sup> FIL WCh in Whistler / CAN: according to the 2020 IRO

#### **b. Training runs at FIL events**

1 <sup>st</sup> WC:	Track newcomers:	4 training runs	
	Rest:	3 training runs	
2 <sup>nd</sup> -9 <sup>th</sup> WC:	for athletes who did not qualify for the previous WC:	5 training runs	
	Track newcomers:	4 training runs	
	Rest:	3 training runs	

The number of training runs offered can be increased or reduced by the FIL Sport or Technical Director if the situation allows.

50 <sup>th</sup> FIL WCh:	Track newcomers:	4 training runs	
	Rest:	3 training runs	

Only athletes who are registered for the competition within the eligibility for participation/NF and also compete in the competition are permitted to participate in the World Cup training.

#### **c. Amount of Staff Technical Procedure**

- The assigned officials and their areas of responsibility are determined jointly by the event organizer and the FIL.
- Jury:
  - Jury WC: according to the 2020 IRO
  - Jury 50<sup>th</sup> FILWCh: according to the 2020 IRO

Officials for training at the track:

Race Director *	1
Sport Director	1
TD	1
Outrun	1-2
<b>Total</b>	<b>4-5</b>

Officials for competitions at the track:

Race Director *	1
TD	2
Sport Director	1
Start leader	2
Finish leader	2
Outrun	1-2
<b>Total</b>	<b>9-10</b>

**d. Team Captains' Meeting**

- All result lists and information of the event organizer will be forwarded contactlessly by e-mail to all teams
- The organizer must make sure that a seat distance of 2 meters is guaranteed for each of the meeting participants.
- Be symptom free, hand hygiene, face covering requirement
- 1<sup>st</sup> TCM: cancel without replacement
- 2<sup>nd</sup> TCM: 1 representative per NF allowed

**e. Awards Ceremony**

- Awards Ceremony: 1-3; flowers and medals are presented immediately following the competition.

**II. FIL Competitions Junior Youth A Classes**

- Staging of the Junior / Youth A World Cups at a continental level (Europe, North America / Asia) (events schedule in planning)  
In Europe: maximum 4 destinations  
In North America: maximum 4 destinations
- 36<sup>th</sup> JWCh in Winterberg / GER as joint competition

**a. Eligibility to participate per NF at FIL events Europe and Asia/North America**

- Quotas for the eligibility to participate per NF. (enclosure 1b status June 28, 2020)
  - Quotas JWC/YAWC – Europe → according to enclosure 1
  - Quotas JWC/YAWC – North America → according to the 2020 IRO, calculation 2022 OWG qualification according to enclosure 1
- If the number of participants in a World Cup event is less than 120 sleds, it is up to the Permanent Technical Delegate Junior / Youth A to fill in the missing quota places by means of an individual decision.
- For the 2020/2021 season, European NFs are only allowed to the race series in Europe and Asian, Oceanic, and North American NFs only allowed to the race series in North America.
- Only athletes who are registered for the competition within the eligibility for participation/NF and also compete in the competition are permitted to participate in the World Cup training.

Eligibility to participate per NF at the 36<sup>th</sup> JWCh in Winterberg / GER according to the 2020 IRO

**b. Training runs at FIL events for the Junior and Youth Classes**

- JWC: 2 paid training runs and 4 official training runs will be offered to all participants.  
The number of training runs offered can be increased or reduced by the Permanent Technical Delegate Junior / Youth A if the situation allows.
- 36<sup>th</sup> JWCh: 2 paid training runs and 4 official training runs

**c. Amount of Staff Technical Procedure**

- The assigned officials and their areas of responsibility are determined jointly by the event organizer and the FIL.
- Jury: JWC Jury Chair + 2 named team captains  
36<sup>th</sup> JWCh: according to the 2020 IRO

Officials for training at the track:

Race Director *	1
TD	1
Outrun	2-3
<b>Total</b>	<b>4-5</b>

Officials for competitions at the track:

Race Director *	1
TD	2
Start leader	2
Finish leader	2
Outrun	2-3
<b>Total</b>	<b>9-10</b>

**d. Team Captains' Meeting:**

- All result lists and information of the event organizer will be forwarded contactlessly by e-mail to all teams
- The organizer must make sure that a seat distance of 2 meters is guaranteed for each of the meeting participants
- Be symptom free, hand hygiene, face covering requirement
- 1<sup>st</sup> TCM: cancel without replacement
- 2<sup>nd</sup> TCM: 1 representative per NF allowed

**e. Awards Ceremony:**

- Awards ceremony: 1-3 on the day of competition – END

**III. TECHNICAL PROCEDURES**

**a. Technical Pre-inspection**

- A large portion of the inspections can be held outdoors if the weather conditions are good (a fenced off area in the finish area)
- In addition, a room with about 10 m<sup>2</sup> is to be made available
- Minimum distance 2 meters
- Providing of disinfectant
- The technical pre-inspections will be carried out exclusively by the 1<sup>st</sup> TD (Technical Director)
- From every national federation, a maximum of 2 coaches / assistants are named who are able to present the entire material for inspection (sled, gloves etc.)
- The inspections will be carried out according to the created schedule

**b. Body weigh-in**

- For the body weigh-in, a well-ventilated room with about 15 m<sup>2</sup> is needed
- This is carried out by the 1<sup>st</sup> TD (Technical Director) and a female judge
- Minimum distance 2 meters
- Providing of disinfectant
- The weigh-in is carried out according to an exact schedule in small groups per NF maximum 4 athletes
- The small groups are put together by the respective coach

**c. Inspections at the Start**

- Clarification of the space situation at all start heights
- Pro NF a maximum of 2 coaches/assistants are permitted for the entire start area
- An inspection zone will be set up in this start area (2020 IRO)

Persons in the inspection zone:      1 x athlete/pair start handles  
   1 x athlete/pair weight inspection  
   1 x athlete/pair temperature inspection  
   Start leader  
   TD  
   TV camera man

Procedure:                                      The sled is handed over by the athletes/pair in front of the control zone.  
  
   The TD checks temperature, gap measurement, and race equipment  
   The start leader checks weight and start procedure

**d. Inspections at the Finish**

- Clarification of the space situation in the finish area
- Pro NF a maximum of 2 coaches/assistants are permitted for the entire finish area
- An inspection zone will be set up in this finish area

Persons in the inspection zone: 1 x athlete/pair  
Finish leader  
TD  
Sport Director  
TV camera man

Procedure: After arriving at the finish, the athlete must leave the outrun independently and activate the random generator.

When green: athlete can leave the finish area immediately

When RED/Blue: athlete goes directly to the inspection zone → temperature inspection (TD) → measurement (TD) → weight inspection (finish leader)

In the 2<sup>nd</sup> CR → always the leader in the leader's box

Maria Luise Rainer, Christian Eigentler

## 1. Preface / Description of the current situation

Dear friends of luge,

The top priority for the International Luge Federation is to protect the health of our athletes, coaches, support staff, officials, members of the organizing committees, and volunteer helpers.

The guidelines that follow are intended to enable a re-entry into professional competition starting November 27, 2020. Described are all measures which need to be taken in the areas of training and competition as well as in related fields to assure maximum protection against infection for all participants.

These guidelines control the standards which the international Association for the Protection of Athletes prescribes for event organizers and national federations in executing their events. In addition, it forms a basis for event organizers to design their protection and hygiene concepts.

Persons who do not conform to the protection and hygiene concept of the event organizer are not authorized to participate in FIL event activities. The concept is mandatory for all athletes and persons involved in the sport. Legally binding consequences are excluded.

## 2. General information

All persons participating in competition activities are instructed to display a high degree of self-initiative and self-responsibility. Persons who do not feel in good health (fever, coughing, congestion) are requested to stay away from FIL events and to consult a physician if necessary.

The following basic rules apply to the sports facility:

- ⇒ Regular hand hygiene and sanitizing
- ⇒ Mask requirement (mouth and nose protection)
- ⇒ Minimum distancing
- ⇒ Follow the signs

For their competitions, the international federation and the event organizer provide specially trained medical personnel (race doctor), who communicates closely with the organizers and the teams. In addition, the event organizer appoints a hygiene manager who serves as the contact partner for the international federation and for the nations participating in the competition.

### **Event organizer's hygiene manager**

The event organizer is fundamentally responsible for compliance with hygiene and infection protection requirements. This responsibility is assigned to the hygiene manager whose appointment is mandatory. The hygiene manager is the contact partner for all race participants and for the responsible authorities of the event organizer. This manager's tasks, besides coordinating all implemented measures, include communicating the special hygiene measures (e.g., by signage or information sheets) and diligently monitoring compliance with these measures. The hygiene manager is also responsible for checking all separate hygiene concepts of the companies commissioned by the event organizer, such as stage builders, etc., who will be working at the event. Together with his or her staff personnel, the manager also ensures that objects are disinfected regularly and ensures that an adequate supply of hygiene materials is available at the race facility.

### **FIL Hygiene Manager**

Just as there is an event organizer's hygiene manager, there is also a FIL hygiene manager. He/she is the contact person for the event organizer and the national federations. He/she controls the adherence to the rules of the event organizer and the national federations. Furthermore, he/she checks the hygiene concepts of the companies commissioned by the FIL, such as TV production, Swiss Timing, etc.

## **3. Recommendations for organizational structure of teams / Guidelines for hygiene concept**

### **Measures for breaking chains of infection transmission**

For faster tracing of potential infection transmission chains, and for the safety of the team itself, teams must be organized into smaller groups which are isolated from other groups in their daily activities. It is recommended that groups be composed of different discipline participants (men, women, and doubles) and different parts of the coaching team. Even if a positive test result were to occur within a group, the other groups from the same nation could continue to participate in the competition. This means that it would be a very rare case for an entire discipline of a national team to have to drop out of the competition. The groups should train separately and spend their time in separate areas of the team hotel. This also applies to dining rooms and workshops. If these areas cannot be partitioned, then meal times or usage times for other facilities must be scheduled for separate time slots. The same principle also applies to athletic training, where the group groupings conduct their training separately. Athletes who exhibit the symptoms of an infection (severe coughing, fever) must be immediately isolated from the team and checked by medical personnel. The athlete may not be reintroduced into the team structure until the possibility of a SARS-CoV-2 infection is excluded.

### **Conduct in training and competition operations**

Before the first training sessions begin on the race track, all national teams participating in the competition are instructed about the event organizer's internationally applicable Covid-19 regulations, regional conditions imposed by the host country and hygiene regulations that apply to the competition. The instructional talks that the event organizer must conduct with the hygiene manager

of a national team will be by video conference. The first will be on Friday, November 20, 2020, then one video conference will be held every Friday before the next week of competition. In addition, team leaders will receive information in written form via e-mail.

### **Hygiene manager**

Every national team will appoint a staff member to be the hygiene manager, and this person's contact information will be reported to the international federation. The hygiene manager performs the following tasks:

- ⇒ Coordinates current regulations with the event organizer
- ⇒ Coordinates internal requirements with the hotel operator (check layout of hotel rooms, define the meal area and schedule the meal times, monitor suitability of workshops, etc.)
- ⇒ Checks hygiene regulations, checks conditions at training areas outside of the track site (gymnasiums, weightlifting/fitness rooms)
- ⇒ Procures sufficient disinfectants (for hands, surfaces) for team use
- ⇒ Instructs/monitors team groups for compliance with hygiene regulations

### **Conduct outside of training and competition (outside of team travel time / at home)**

The following code of conduct is recommended to athletes and support staff for their activities outside of competition times:

- ⇒ Avoid assembly with groups of people in public
- ⇒ When going for a walk or doing sport activities, maintain a distance of 1.5 meters to third parties.
- ⇒ Only receive a few house visitors
- ⇒ Do not use any public transportation
- ⇒ Avoid direct contact with potentially infected persons
- ⇒ Clean and disinfect frequently touched surfaces such as tables, door handles, and stair handrails
- ⇒ Follow hygienic practices when preparing foods
- ⇒ Optimize and intensify one's own hygienic measures, e.g., thorough and regular hand washing and sanitizing
- ⇒ Due to the heightened risk of infection, avoid touching one's face as much as possible, especially the eyes, mouth, and nose (mouth and nose protection)
- ⇒ Document your contact persons (bring suitable list)
- ⇒ Document your daily activities and training
- ⇒ Use the Corona App

### **National hygiene concept**

To participate in FIL international races, all national federations must submit a national hygiene concept (Supplement 3). The national concept must, first and foremost, describe how the teams conduct themselves outside of international competition activities. In addition, national regulations can be highlighted in the concept, especially those which are not provided for in the FIL hygiene concept.

### **Travel to training and competition venues**

Athletes and support staff who participate in FIL international competitions are classified as either professional athletes or event organizers, and they perform their occupations as such. Therefore, travel regulations for employed professionals apply to this group.

### **Long-distance trips / flights**

If travel restrictions at the outer borders of the EU and to North America in both directions are loosened, then all national federations are asked to organize their trips to the venues where events are being conducted according to currently prescribed travel conditions. This includes strict adherence to all hygiene rules in force for airplane trips. In addition, it is recommended that the national teams sit apart from other air travelers.

### **Travel by car**

Local national rules of the host countries apply to travel by vehicle to FIL races. They limit the number of persons per vehicle and specify certain precautionary hygiene measures. These procedures support the hygiene concept of the federations. Should further loosening of restrictions occur in this area, it is still recommended that the number of persons be limited to two persons per seat row for large vehicles and passenger cars. Only tested athletes or support staff may travel in vehicles which are used by nations to travel to the race venue. Other persons are prohibited from traveling in the same vehicle.

### **Housing of teams**

#### **Constraints for hotel infrastructure**

The national hygiene rules of the venue at which the event is held apply to team housing. In choosing their accommodations, teams should make sure that they are large enough to ensure ease of compliance with distancing rules.

It is also recommended that athletes be housed in single rooms. Unless prohibited by applicable hygiene rules, double rooms may also be used. It should be ensured that the rooms are large enough to permit distancing. In addition, the beds should be located in separate areas with sufficient distancing. In making reservations, it should be ensured that the rooms are distributed around different areas of the hotel (to isolate internal groups from one another). It should also be ensured that the teams interact in small groups or groups made up of members from different disciplines – as described in item 2.

In the dining rooms, it should be ensured that the eating areas for the teams are spaced sufficiently apart from the other hotel guests. It is recommended that teams minimize their contact with other hotel guests and with hotel staff. Restaurant rules apply to hotel service. If they are not properly observed by the hotel operator, the hygiene manager must intervene.

Larger teams which need a workshop for preparing their sport equipment should ensure that these spaces have adequate ventilation. Basement rooms are rather unsuitable for this. In addition, it is recommended that workshops be distributed among multiple rooms.

### **Mandatory rules**

The international federation organizes accommodations for sport teams of less than 10 persons which meet the requirements of the hygiene concept. National federations should register their head counts and travel schedules by September 2, 2020. FIL will then recommend appropriate hotels which are then binding and must be booked by the national federations. All sport teams of more than 10 persons must register their booked accommodations with FIL by September 2, 2020 as well.

Accommodations for individual groupings are made as follows:

- ⇒ Group 1: Athletes, coaches, support staff
- ⇒ Group 2: FIL functionaries, ST sport, etc.

Housing distribution:

- ⇒ Group 1: Housing 1 to...
- ⇒ Group 2: Housing 1 to...according to the team accommodations

### **Athletic training**

All teams must conduct their athletic training according to hygiene requirements that apply to indoor sports. It should be ensured that the training areas are equipped with the materials needed for proper hygienic conditions – such as sufficient supplies of hand and surface disinfectants as well as suitable hygiene instructions. In addition, the sizes of training groups should be limited to a maximum of 8 persons.

### **Physical therapy**

Physical therapy measures must be limited to the extent necessary. Pertinent hygiene conditions and mouth/nose protection, hand and surface disinfection apply here.

Separate spaces must be organized for physical therapy, and they must not be used simultaneously as sleeping rooms.

### **Sports medicine**

It is recommended that all teams be assisted by continuous medical support by a physician. Smaller teams which do not have their own physician can make use of the medical assistance provided by the organizer.

## **4. Determining who is authorized to compete (health checks)**

### **National health check**

Only athletes and coaches who have a medical certificate with a negative COVID-19 result are admitted to the first competition. The report must be submitted in German or English and must not be older

than 5 days. The same procedure also applies to the competition staff of the international federation and the OC teams of the event organizer. The costs for testing their own national teams are carried by the national federations.

All other persons present at the venue (TV teams, media representatives etc.) are also obliged to present a negative COVID-19 result not older than 3 days to the organizer.

### **International health check by the event organizer**

In addition, on the Monday of the current competition week, the same group of persons at each competition site shall undergo an infection test by the event organizer, as prescribed by the international federation. In addition, at the first World Cup of the current season and at the first World Cup after the Christmas break, the medical result of the test (national health check) from the previous week must be presented to the event organizer. This also applies if during the current competition season there are interruptions in the competition phases lasting longer than 6 days.

### **Result management**

The results of the tests are sent from the laboratory to the FIL's chief medical doctor in writing or via an app to the race doctor and another doctor assigned to the event organizer.

Persons tested positive will be immediately placed under medically ordered quarantine for at least 14 days and may only participate in further events after another health examination. To ensure that the organizer can communicate the affected group of persons who are at risk for a potential infection (tracking of infection transmission chain) to health authorities, all contact data of all athletes and support staff participating in the competition must be submitted to race leadership. These data can also be taken from the FIL online registration for FIL events.

The event organizer is obliged to reserve appropriate test capacities. The test results must be available within 12 hours.

### **Test quality**

The tests used comply with the internationally prescribed standards for identifying SARS-CoV-2 infections. The country-specific standards of the infection test must be agreed upon with the FIL.

## 5. Planning for personnel needs

Zone distribution															
Zones	4,5	1,3,	1,2,3,4,5,6,7,8	1,2,3,8	1,2,3	2	1,2,3	1,2,3,4,5,6,7,8	1,2,3,4,5,6,7,8	1,2,3,4,5,6,7,8	6,2	1,2,3			
	OC		FIL	Athletes	Coaches, support staff	Track	Safety	Med. personnel	Hygiene	Cleaning	Media		Construction structures	Agencies	Total number of persons for competition
	OC 1	OC 2									TV	Press			
1	Start area														
2	Track course														
3	Finish outrun														
4	Timing														
5	Race office														
6	TV compound														
7	Media														
8	Anti-Doping														

Must be filled out by OC

FIL Sports Director

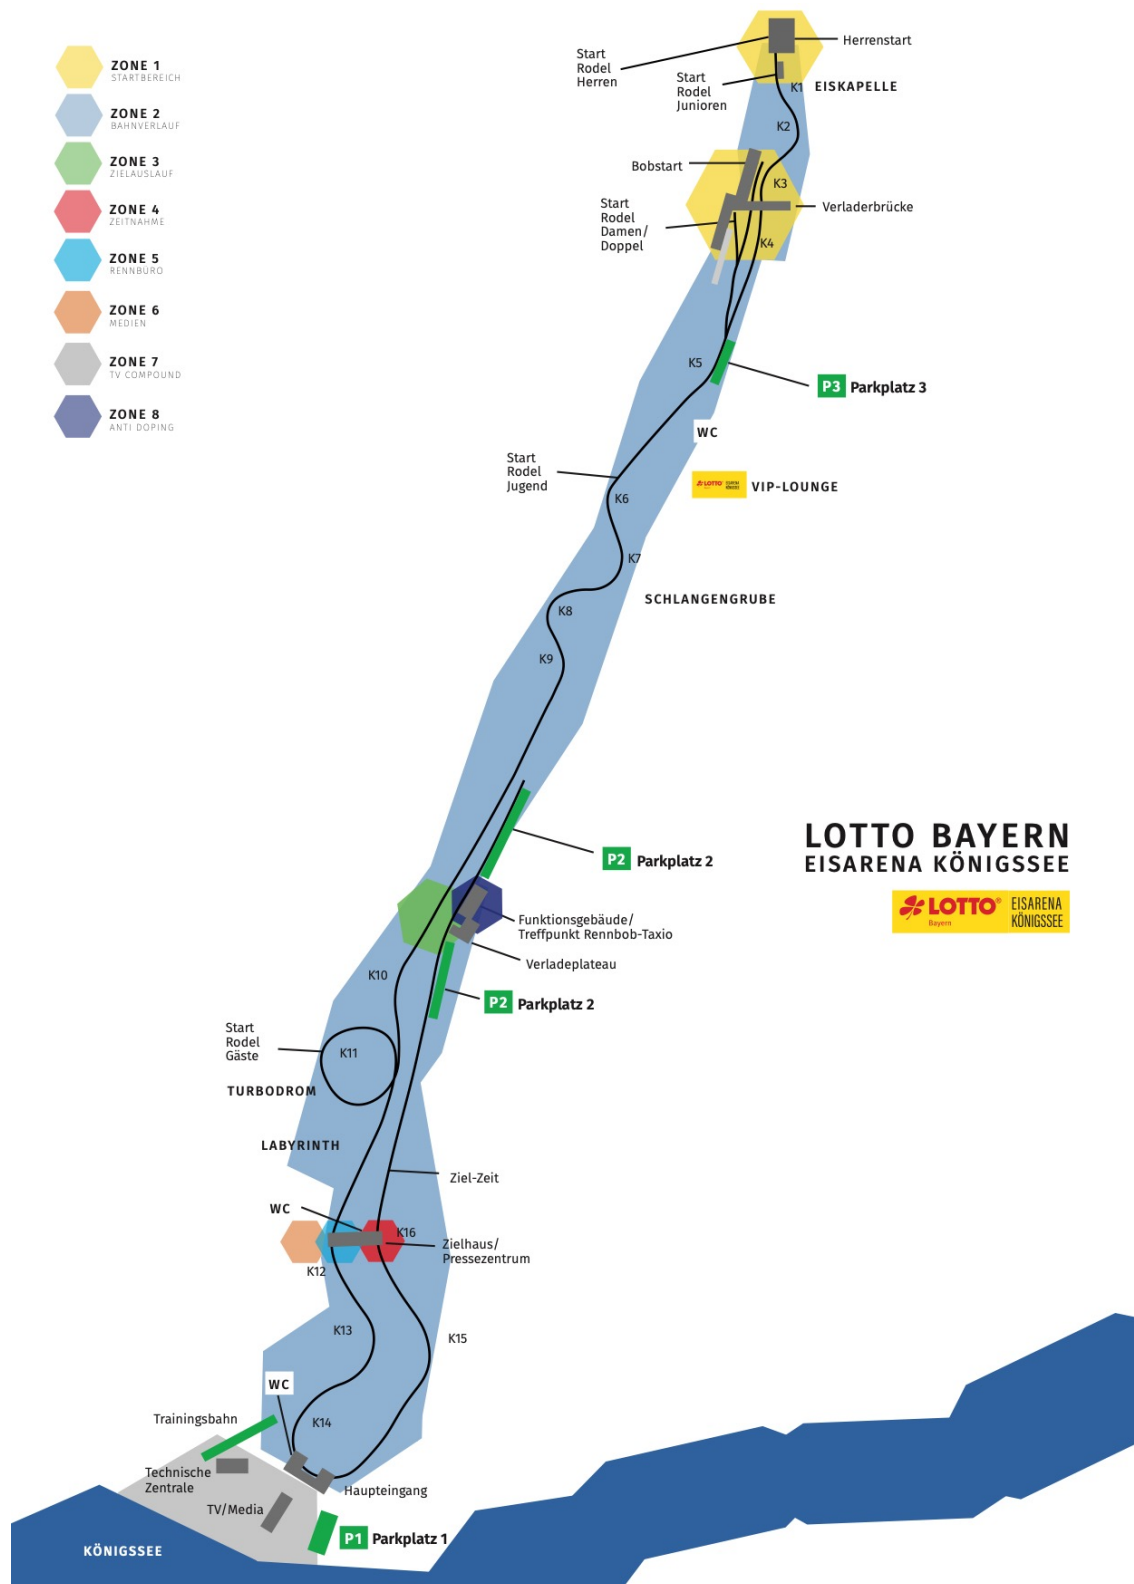

FIL Press Spokesperson

FIL TV coordinator

OC 1 = Central organization team

OC 2 = Judges and helpers

### Example of zone distribution (Königssee)

## **Fundamentals of personnel requirements planning**

The track site is subdivided into eight zones for better clarity:

- Zone 1: Start area
- Zone 2: Track course
- Zone 3: Finish outrun
- Zone 4: Timing
- Zone 5: Race office
- Zone 6: Media
- Zone 7: TV compound
- Zone 8 Anti-Doping

The number of persons distributed over the entire track site at any given time must be limited to a maximum. These maximum values are found in a table for requirements planning which must be coordinated with the FIL. To conform to the prescribed upper limits, all groups must be reduced to a minimum. Maximum person restrictions for the individual zones of the track also apply. They are specified according to current figures from the filled-out personnel requirements planning table presented to the FIL by the event organizer. It is not possible to offset numbers of persons in the different zones. Personnel requirements planning considers the total head count in the given zone over the entire day of training or competition. It offers an overview to the organizer and to health authorities regarding where people are moving in the sports facility and how many of them. The organizer is responsible for conforming to the numbers in the plan.

Between training and race times, the FIL schedules sufficient idle times for changing the groups of people working at different times in the track area.

The planning concept gives the event organizers a framework to determine how many persons are located on the site and where the sensitive areas are in which special precautions need to be taken.

## **6. Rules for admittance to the sports venue**

Admittance to the sports venue is only possible with accreditation. Only the FIL annual accreditation and the accreditation of the event organizer are valid here. At their first admittance to the venue site, persons not tested by the event organizer for Covid-19 must show, in addition to their accreditation, the results of a valid infection test that is not older than 3 days.

### **National teams**

All national teams must arrive with accredited team vehicles. Accreditations for the vehicles are given out in advance of the event. Accreditations of team vehicles and of all persons are checked at the entry/exit of the sport site.

## **Exceptions**

Persons and vehicles which need to enter/drive onto the track site to make a delivery or provide a service may only do so after filling out a survey (Supplement 4) and may only stay for a brief time and in compliance with the described hygiene rules.

## **7. Infrastructure, organization, catering**

### **Team captains' meetings**

As a rule, all results lists and information from the event organizer is provided to all teams in a contactless way by e-mail. The first team captains' meeting is cancelled. Instead, the event organizer's information is communicated online. The second team captains' meeting will be conducted under the following conditions:

- ⇒ The team captains' meetings will take place in sufficiently large event halls.
- ⇒ Only one person per national federation will be admitted.
- ⇒ The event organizer must ensure a seat spacing of 2 meters for every session participant.
- ⇒ Hygiene rules (mouth/nose protection and hand sanitizing) apply.

### **Meetings of the Organizing Committee**

Organizational meetings of the organizing committee must, as a rule, be performed in small groups or by video conference. If this is not possible, the conditions for team captains' meetings apply.

### **Use of meeting rooms and offices**

The OC and the international competition organizers may use the event organizer's office spaces for event organization. It should be ensured that an area of at least 10 square meters is provided for each person in an office. If the room spaces are not large enough, the number of persons must be adjusted accordingly. It must be ensured that rooms are ventilated regularly and sufficiently and that currently applicable requirements for protection against infection are adhered to at the workplace.

If existing office capacities are insufficient, the organizer must provide adequate temporary structures.

### **Catering**

All members of the OC, as well as media representatives, are provided exclusively with sealed goods (lunch packages, muesli bars, etc.). Hot meals are only served in the hospitality area or specially designated areas under applicable rules for food service operations.

### **Transport**

- ⇒ The transportation of sleds up to the start area between runs will be performed exclusively by the event organizer's official transportation service
- ⇒ Self-organized transports are not permitted
- ⇒ The driver and the athletes must wear mouth/nose protection or a helmet with a closed visor
- ⇒ A maximum of 5 persons, including the driver, are permitted in the transporter
- ⇒ The event organizer will provide sufficient transport capacity to avoid too large an accumulation of athletes in the finish area
- ⇒ Adjustments of the rules due to special characteristics of the transport vehicles can be made in coordination with the FIL's hygiene manager

## **8. Space utilization programs**

### **Start houses / changing areas**

- ⇒ Use of the changing areas should be limited to a minimum (change shoes, prepare helmet and visor)
- ⇒ In the start houses, a minimum distance of two meters must be maintained between athletes. The event organizer will mark the changing areas appropriately
- ⇒ Access is restricted to a specific number of athletes and support staff. The maximum number of persons is limited by the size of the building. The following size key applies here: Usable area / 4 sqm. = max. permissible head count
- ⇒ Mouth and nose protection must be worn in the changing area
- ⇒ The changing areas must be disinfected on a regular basis when switching user groups
- ⇒ Sufficient amounts of disinfectant must be provided at the building entrance
- ⇒ The use of restrooms is limited to a maximum of two persons
- ⇒ If possible, access to the building should be organized with two entrances/exits to minimize contact encounters

### **Outrun buildings**

- ⇒ In the outrun buildings, a minimum distance of two meters must be maintained between athletes. Changing areas must be marked appropriately.
- ⇒ Access is restricted to a specific number of athletes and support staff. The maximum number of persons is limited by the size of the building. The following size key applies here: Usable area / 4 sqm. = max. permissible head count.
- ⇒ Room partitions must be set up if necessary, to generate maximum protection against infection.
- ⇒ Mouth and nose protection must be worn in the changing areas.
- ⇒ The changing areas must be disinfected on a regular basis when switching user groups.
- ⇒ Sufficient amounts of disinfectant must be provided at the building entrance.

- ⇒ The use of restrooms is limited to a maximum of two persons.
- ⇒ Security personnel must be available to enforce compliance with requirements.

### **Finish house**

- ⇒ A minimum distance of two meters must be assured between persons working in the finish buildings. If this is not possible – e.g., for timers where the instrumentation is usually installed in tight spaces – suitable measures must be taken such as setting up partition walls
- ⇒ Access is restricted to a certain maximum number of persons
- ⇒ Sufficient amounts of disinfectant must be provided at the building entrance
- ⇒ In all interior rooms, the minimum distance applies, and mouth/nose protection must be worn
- ⇒ The use of restrooms limited to a maximum of two persons
- ⇒ Security personnel must be provided to enforce compliance with requirements

These ground rules for space usage in sport facilities only apply to rooms in which people work or spend time. Therefore, not all areas need to be surveyed in detail in this conceptualization.

## **9. Media zones / press / photographers, TV**

Upon entering the sport facility, all media representatives must present proof of a negative infection test (not older than 3 days). Their work areas are organized as follows:

### **Offices / working spaces**

- ⇒ A minimum distance of two meters must be assured between persons working in the finish buildings. If this is not doable, the event organizer is obligated to remedy the situation by creating temporary structures – such as container solutions
- ⇒ Access is restricted to a certain maximum number of persons. The maximum number of persons depends on the size of the building. The following size key applies here: Usable area / 4 sqm. = max. permissible head count
- ⇒ If distances cannot be guaranteed, room partitions must be set up
- ⇒ Sufficient amounts of disinfectant must be provided at the building entrance
- ⇒ Mouth/nose protection must be worn
- ⇒ The use of restrooms is limited to a maximum of two persons

### **Competition areas**

For media workers and photographers, designated zones must be created which offer sufficient space for their work while conforming to generally applicable distancing rules. If the designated zones are inadequate for this, the organizer must establish a sequential order in coordination with journalists

and photographers so that they can perform their media work safely. The process is coordinated by the responsible media chief for the event.

Areas located close to the athletes for TV production will be discussed with producers and TV broadcasters, and they will be demarcated according to a jointly agreed requirement.

Because media representatives depend on direct contact with the athletes and coaches, the following additional measures must be taken to protect athletes.

- ⇒ Live interviews in the finish area are, in principle, possible. Appropriate distancing needs to be maintained to the athletes, and this is marked by the structures of the mixed zone (to be specified by FIL and the organizer).
- ⇒ The event organizer will organize press conferences during the competition week and after the competition by video conference.

## **10. Organization training and competitions for the general class**

### **New training and competition rules**

Training of the approx. 120 athletes will be subdivided into four training groups, so that no more than approx. 30 athletes are training together in one training unit. There is enough time between individual training group sessions to switch the individual groups in such a way that overlaps of user groups are avoided. Changing rooms will only be used for short stays or will only be used for preparations immediately before the start. To enable implementation of this, the athletes arrive at the sport facility already wearing their race apparel.

#### Week's agenda

MON.: Arrival at event site with negative COVID-19 test result

New COVID-19 test by the organizer or by FIL

TUES.: If athlete is certified with negative test result → Training

If test result is positive → additional health checks, home quarantine

WED.: Training

THURS.: Training

FRI.: Training, competitions

SAT.: Races

SUN.: Races

#### **FIL competitions general class**

Changes to the planned FIL events schedule according to the status of June 5, 2020, are possible under reserve. It is possible to adapt the disciplines to the requirements and the situation.

### Eligibility to participate per NF at FIL events

The quotas of the eligibility to participate in the World Cup have been reduced in order to protect against a number of participants that can no longer be safely organized (see FIL Bulletin 73).

Registration for the 2020 / 2021 FIL World Cup series (online registration) must be completed by October 31, 2020.

If the number of participants at a World Cup event is less than 120 sleds, it is up to the FIL Sport Director and the Technical Director to fill in the missing quota places by means of an individual decision.

Eligibility to participate 50<sup>th</sup> FIL WCh: according to the 2020 IRO

### Training runs at FIL events

1 <sup>st</sup> WC:	Track newcomers:	4 training runs
	Rest:	3 training runs
2 <sup>nd</sup> -9 <sup>th</sup> WC:	for athletes who did not qualify for the previous WC:	5 training runs
	Track newcomers:	4 training runs
	Rest:	3 training runs

The number of training runs offered can be increased or reduced by the FIL Sport or Technical Director if the situation allows.

50 <sup>th</sup> FIL WCh:	Track newcomers:	4 training runs
	Rest:	3 training runs

Only athletes who are registered for the competition within the eligibility for participation/NF and also compete in the competition are permitted to participate in the World Cup training.

### Amount of Staff Technical Procedure

The assigned officials and their areas of responsibility are determined jointly by the event organizer and the FIL. The groups of people should be kept as small as possible.

Jury WC:	according to the 2020 IRO
Jury 50 <sup>th</sup> FILWCh:	according to the 2020 IRO

Officials training:	Race Director	1
	Sport Director	1
	TD	1
	Outrun	1

Officials competition: as in training  
plus start and finish leaders two people each

### Awards ceremony

Only flower ceremony places 1-3; flowers and medals are awarded immediately following the competition.

### **FIL Competitions Junior Youth A Classes**

Staging of the Junior / Youth A World Cups at a continental level (Europe, North America / Asia)

- ⇒ In Europe: maximum 4 destinations
- ⇒ In North America: maximum 4 destinations
- ⇒ 36<sup>th</sup> JWCh in Winterberg according to the IRO

### Eligibility to participate per NF at FIL events Europe and Asia/North America

Quotas for the eligibility to participate per NF according to FIL Bulletin 73

- ⇒ quotas JWC/YAWC – Europe, according to FIL Bulletin 73
- ⇒ quotas JWC/YAWC – North America, according to the 2020 IRO
- ⇒ calculation 2022 OWG qualification, according to new regulation

If the number of participants in a World Cup event is less than 120 sleds, it is up to the Technical Delegate responsible to fill in the missing quota places by means of an individual decision.

For the 2020/2021 season, European NFs are only allowed to the race series in Europe and Asian, Oceanic, and North American NFs only allowed to the race series in North America.

Only athletes who are registered for the competition within the eligibility for participation/NF and also compete in the competition are permitted to participate in the World Cup training.

### Eligibility to participate per NF at the 36<sup>th</sup> JWCh in Winterberg / GER according to the 2020 IRO

### Training runs at FIL events for the Junior and Youth Classes

JWC:

2 paid training runs and 4 official training runs will be offered to all participants.

The number of training runs offered can be increased or reduced by the Permanent Technical Delegate Junior / Youth A if the situation allows.

36<sup>th</sup> JWCh: 2 paid training runs and 4 official training runs

### Amount of Staff Technical Procedure

The assigned officials and their areas of responsibility are determined jointly by the event organizer and the FIL.

Jury: JWC Jury Chair + 2 appointed team captains  
36<sup>th</sup> JWCh: according to the 2020 IRO

Officials for training: (see general class)

Officials for competition: (see general class)

### Awards ceremonies

Awards ceremony: places 1-3 at the end of the competition day

## General Technical Procedures

### Technical pre-inspection

- ⇒ Many of the checks can be performed outdoors under good weather conditions (area at start or finish defined by barrier fencing)
- ⇒ A room must also be provided with a floor area of approx. 10 m<sup>2</sup>
- ⇒ Minimum distancing of 2 meters
- ⇒ Provision of disinfectant
- ⇒ The technical pre-inspection is performed exclusively by the 1st TD (Technical Director)
- ⇒ A maximum of 2 coaches/support staff must be appointed by each national federation to present all race equipment of the NF (sleds, gloves, etc.) for inspection
- ⇒ The inspection order is according to the schedule prepared

### Weigh-in

- ⇒ A well-ventilated room with a floor area of approx. 15 m<sup>2</sup> is needed for the weigh-in
- ⇒ The weigh-in is carried out by the 1st TD (Technical Director)
- ⇒ Minimum distancing of 2 meters
- ⇒ Disinfectant must be provided
- ⇒ The weigh-in is conducted in small groups according to a precise schedule. A maximum of 4 athletes per NF.
- ⇒ The small groups are created individually by the respective coach

### Inspections at the start

- ⇒ Clarification of spatial conditions at all start heights.
- ⇒ A maximum of 2 coaches/support staff per NF are permitted in the entire start area.
- ⇒ An inspection area (IRO 2020) is set up in this start area.  
Persons in the inspection area at the start (weight, temperature, and inspection false start):

1 athlete/doubles pair

Start leader

Technical Delegate

TV camera person

Procedure:

The sled is transferred by the athlete/doubles pair before the inspection zone.

The TD inspects the temperature, gap dimension, and race equipment.

The start leader checks weight and the starting sequence

### Inspections at the finish

- ⇒ Clarification of spatial conditions in the finish area.
- ⇒ A maximum of 2 coaches/support staff per NF are permitted in the entire finish area.
- ⇒ An inspection area is set up in the finish area.

Persons in the inspection area:

1 athlete/doubles pair

Finish leader

TD

Sport Director

TV camera person

Procedure:

After arriving at the finish, the athlete must leave the outrun without any help and activate the random generator.

If green: Athlete can immediately leave the finish area

If RED/blue: Athlete goes directly to the inspection zone → for a temperature check (TD) → dimensions (TD) → weigh-in (finish leader)

In the 2nd run, the leader is always in the leader box

#### Program changes:

Changes to the FIL events schedule are possible at any time due to impending cancellations of competitions.

It is possible to adapt the sequence of disciplines during competitions as well as the planned extent of training to current requirements.

#### Doubles

- ⇒ Only one athlete (front or back athlete) goes to the start with the sled and takes his/her position. Until then, the athletes must maintain minimum distancing. Then the second athlete takes his/her position. The start must be executed rapidly after the countdown (35 seconds or 45 seconds).
- ⇒ Direct contacts must be limited until the start and descent down the track.
- ⇒ The contact time when the athletes are closer than the minimum distancing without visors closed is approx. 15 to 20 seconds.
- ⇒ At the finish, the visors are kept closed until both athletes have left the sled. Only one of the athletes carries the sled to the finish area.

#### Doping tests

- ⇒ Doping tests must be performed according to international standards specified by WADA.
- ⇒ Hygienic conditions must be maintained according to requirements of the testing organization (e.g., ITA, NADA, WADA). The event organizer provides for the necessary basic conditions.

### Awards ceremonies

Only the flower ceremony is performed while simultaneously awarding medals. The person awarding the prizes must wear mouth/nose protection.

## **11. Extended competition structure**

### **Spectators**

Fundamentally, it is planned to hold the races without spectators. However, if spectators are permitted for the event, the athletes and support staff must be protected according to the following rules:

- ⇒ The event organizer agrees to implement the generally applicable conditions for large events
- ⇒ The event organizer agrees to mark or block all areas of the sport facility so that it is impossible for spectators to have any direct contact with the athletes (minimum distancing)
- ⇒ The maximum number of spectators is to be coordinated with the FIL

### **TV production**

The TV production company agrees to submit a hygiene concept to the organizer and the contracting authority. The goal is to protect every individual worker and to isolate TV production from the sports area as completely as possible. It is only possible to achieve maximum protection of athletes by consistent hygiene, instilling a sense of responsibility in all employees and minimizing time overlaps and spatial proximity. Individual hygiene measures are the most important activities for protecting against infections, and the production staff must comply with them. All employees working on-site must declare their consent to adhere to hygiene regulations and the necessary health checks. In addition, all TV production employees must show the results of an infection test conducted no more than 3 days prior.

Camera people whose movements are close to the sport area get a special briefing.

The organizer and the international federation are entitled to make individual corrections and modifications to the hygiene concept of the producers.

### **Other infrastructure-related constructions**

All companies which set up infrastructure-related constructions such as stands, barriers, video screens, etc., agree to adhere to the event organizer's hygiene requirements – such as wearing mouth/nose protection in relevant spaces, maintaining distancing or sanitizing hands and surfaces. Each company will receive an information sheet about this in which the measures are described. Direct contact with the event organizer is prohibited; talks must be held via telephone. If the time spent on the site extends beyond 8 hours, the employees must also show proof of a valid infection test (not older than 3 days).

### **VIP / Hospitality**

The VIP and hospitality exclusively serve to provide meals to the persons participating in the competitions if they do not have the opportunity to leave the event venue during the day.

The generally applicable regulations for food service operations apply to this area – such as instructions on available sanitizing options, hand washing, minimum spacing between tables, disinfecting measures for surfaces and objects, and personal hygiene protection for employees.

## **12. Transition phase to the next competition venue**

As a rule, travel home between individual competitions is not permitted. This is only possible in exceptional cases that have been specially approved by FIL.

Continuing travel to the next event venue is conducted according to the travel regulations of the concept.

All teams coordinate their schedules with the World Cup coordinator in advance for the next infection tests on Monday at the next event venue (avoidance of too large gathering of people).

Training for the next competition can only be resumed after a negative test has been confirmed by the new event organizer.

After the Christmas break, all national federations must present to the organizer national test results from the prior week.

This is also required if active athletes enter the World Cup or resume it at a later date.

The test procedure for all subsequent events is as already described in the concept.

## **13. Supplement 1 Information from the event organizer**

### **14. Supplement 2 Confirmation by national federations**

### **15. Supplement 3 National hygiene concept**

### **16. Supplement 4 Survey on SARS-CoV-2 risk**

Thomas Schwab

Marie Luise Rainer

Christian Eigentler

(Members of the FIL Covid-19 Commission)

Dr. Christian Schneider

(Lead Team Physician for the Bobsleigh and Luge Federation for Germany)

(Chairman of IBSF Medical Committee)

## Supplement 1 Information from the event organizer

### **Information on the event organizer's protection and hygiene concept**

In reference to the hygiene concept specified by the international federation, organizers will need to provide the following supplemental data related to the concept:

#### **1. Event organizer**

Location of event:

Event time period:

Responsible head of organization:

Contact data (address, e-mail; phone numbers):

#### **2. Hygiene manager / health test by the event organizer for national teams**

Event organizer's hygiene manager:

Planned informational event online/e-mail on (date):

Planned on-site health check performed by:

Time period:

Planned test or test kit:

Responsible health authority:

#### **3. Organization of team meetings and race office:**

Place:

Room sizes in square meters:

Maximum number of persons in meeting rooms and offices:

Special hygiene conditions / rules:

Temporary extensions:

#### **4. Information on the space utilization programs**

Start buildings

Size of changing areas in square meters:

Maximum number of permitted occupants:

Regulation of walking paths to avoid excessive encounters in narrow areas (stairs, general bottlenecks on the event site, one-way rules):

Outrun building

Size of changing areas in square meters:

Maximum number of people permitted:

Regulation of walking paths to avoid excessive encounters in narrow areas (stairs, general bottlenecks on the event site, one-way rules):

## 5. Organization of media and press

Allotment of interior work areas and their locations

Press:

Photographers:

TV:

Temporary extensions:

Location data and subdivision of outdoor work areas

Designated zones for press:

Designated zones for photographers:

Designated zones for TV people:

Personnel restrictions:

Hygiene conditions / rules:

## 6. Organization of infrastructure-related measures

Information on organizer's designated training areas for athletic training by teams with hygiene standards (place, organization of registration):

Place:

Usage times:

Special measures for counting numbers of people on the event site:

Planned spectator numbers (if permitted):

Special hygiene rules for spectators:

Special catering zones and organization of catering (hygiene standards):

Catering concept

Planned caterer

**7. Declaration of consent**

We hereby accept the measures described in the FIL hygiene concept and confirm the correctness of our statements.

---

Signature of event organizer

## Supplement 2 Affirmation by the national federations

### **Affirmation of FIL protection and hygiene concept**

We hereby affirm that our national federation has explained the contents of the FIL protection and hygiene concept to athletes and support staff participating in all competitions.

#### **Declaration of consent**

We hereby assure that we will implement the standards defined in the FIL hygiene concept for avoiding SARS-CoV-2 infections in accordance with the measures specified in the concept.

National federation: \_\_\_\_\_

\_\_\_\_\_

Signature

### Supplement 3 National hygiene concept

## National hygiene concept

Description of team conduct outside of FIL competition activities and national rules on conduct to combat SARS-CoV-2 infections.

National federation:

1. Generally applicable rules
2. Travel
3. Rules for hotel accommodations
4. Rules for track training
5. Rules for athletic training
6. Rules and code of conduct for athletes and support staff outside of national training operations
7. Name and contact data of hygiene manager:

---

Signature

## Supplement 4 Survey

# Survey on SARS-CoV-2 risk for FIL events

### 1. Personal data

Family name:
First name:
Date of birth:
Address:
Telephone (mobile):
E-mail:

### 2. Contact risk evaluation

Please answer the questions for evaluating your contact risk with SARS-CoV-2	Yes	No
Have you had contact with anyone confirmed as SARS-CoV-2 positive within the past 14 days?		
In the past, did authorities order a quarantine in conjunction with SARS-CoV-2? If so, please indicate the date when the order expired:		
Were you outside of your registered hometown within the past 14 days? If yes, please explain when and where:		

### 3. Evaluation of symptoms

Please answer the questions about your current clinical symptoms! (Please answer for the time period of the past 14 days)	Yes	No
Fever		
General feeling of illness, headache and aches in the limbs		
Coughing		
Dyspnea (shortness of breath)		
Altered sense of taste or smell		
Sore throat		
Rhinitis (sniffing)		
Diarrhea		

If you have answered “YES” to any of the questions please report to the race doctor.  
Dr.....Mobile:.....

### 4. The following basic rules apply to the sport facility:

- ⇒ Maintain distancing
- ⇒ Mandatory mouth and nose protection
- ⇒ Regular, thorough hand washing or sanitizing
- ⇒ Follow instructions on signs

Please also follow the generally applicable hygiene rules. We are always available to answer any questions you might have, and we wish you a good start into the upcoming event week.

Artificial Track       Natural Track

Applicant: VP Marketing

§ 7 2.4

Motion No.:

## Old text:

### 2.4 Caps, Headbands, and other Headgear

Caps, headbands, and other headgear may each have a maximum of three (3) trademarks of the manufacturer and/or other sponsors, with a total surface of 90 sq cm maximum.

## New text:

### 2.4 Caps, Headbands, and other Headgear

Caps, headbands, and other headgear may each have ~~a maximum of three (3) trademarks of the manufacturer and/or other sponsors, with a total surface of 90 sq cm maximum.~~ **one trademark of max. 60 sq cm in the middle of the frontside and on both sides one trademark of the manufacturer (max. 15 sq cm per side) and one trademark of another sponsor (max. 15 sq cm per side).**

## Reason:

The expansion of advertising space has been agreed with RGS and in front and represents an enormous value for all National Federations in their marketing opportunities.

## Based on the change(s), which sections are to be supplemented?

## **DOUBLES QUALIFICATION PROCEDURE – CLARIFICATION FOR UPCOMING WOMEN’S DOUBLES**

### **BACKGROUND:**

FOR LUGE, IN BOTH FIL AND OLYMPIC RACES, DOUBLES IS AN OPEN GENDER CATEGORY, HOWEVER WOMEN HAVE GENERALLY NOT COMPETED IN DOUBLES AT THE ELITE LEVELS AS AN EQUAL PLAYING FIELD FOR MEN AND WOMEN WAS HARD TO ATTAIN. IN AN EFFORT TO INCREASE THE PARTICIPATION OF WOMEN, WE HAVE INTRODUCED A NEW DISCIPLINE, GENDER SPECIFIC, INTO OUR WORLD CUPS – WOMEN’S DOUBLES. THE GOAL IS TO HAVE COMPLETELY SEPARATE COMPETITIONS, CURRENTLY USING DIFFERENT SLEDS – MEN’S DOUBLES AND WOMENS DOUBLES – AS WE PHASE INTO THIS NEW DISCIPLINE WITH THE GOAL OF APPLYING FOR WOMEN’S DOUBLES IN THE 2026 WINTER OLYMPIC GAMES.

### **CURRENTLY:**

1. WE SUCCESSFULLY INTRODUCED WOMEN’S DOUBLES COMPETITIONS INTO OUR 2019-20 SEASON AT THE “YOUTH A” LEVEL.
2. FOR 20-21, WE PLAN ON RACES FOR WOMEN’S DOUBLES AT YOUTH A AND JUNIOR WORLD CUPS
3. FOR 21-22 SEASON WE PLAN ON RACES FOR WOMEN’S DOUBLES AT ALL RACE LEVELS, INCLUDING GENERAL CLASS WORLD CUPS.

WITH THIS PLAN IN MIND, WE NEED *TO CLARIFY* THE EXISTING APPROVED OLYMPIC QUALIFICATION PROCESS (POSTED ON FIL WEBSITE) FOR A NATION WHO MAY WANT TO QUALIFY A WOMENS DOUBLES TEAM(S).

### **CLARIFICATION:**

1. WOMEN’S DOUBLES MAY ENTER BOTH THE WOMEN’S DOUBLES RACE AND THE DOUBLES RACE AT ANY GIVEN WORLD CUP.
2. WOMEN’S DOUBLES, REGARDLESS OF THEIR RACE CATEGORY CHOICE, WILL ALWAYS BE REQUIRED TO RACE ON THE STANDARD SLED.
3. WOMEN’S DOUBLES TEAMS MAY EARN THE MINIMUM REQUIREMENTS FOR THE NUMBER OF REQUIRED RACES (FIVE) IN THE FIRST PART OF QUALIFICATION PROCESS UNDER C.3.1 IN EITHER DOUBLES RACES – GENERAL DOUBLES OR WOMENS DOUBLES.

#### **C.3.1 Minimum FIL Olympic Qualification Standard (MQS)**

Athletes must have competed and earned points in a minimum of five (5) World Cup, Junior World Cup (Junior Class), or Nations Cup races during the Pre-Olympic Season (1 July 2020 – 30 June 2021, hereafter defined as Pre-Olympic Season) and Olympic Season (1 July 2021 – 31 December 2021, hereafter defined as Olympic Season) combined .....

*(LOGIC: DOUBLES TEAMS- MENS, WOMENS, MIXED - RACE FROM THE SAME START HEIGHT)*

[Hier eingeben]

4. REGARDING THE NUMBER OF POINTS NEEDED TO MEET MINIMUM REQUIREMENTS (5 POINTS FROM 5 RACES COMBINED FOR TWO SEASONS OR 44 POINTS FROM TWO WORLD CUP RACES IN THE OLYMPIC SEASON):  
POINTS CAN **ONLY BE EARNED** FROM RACING IN THE CATEGORY “**DOUBLES**” AND TEAMS MUST STAY WITHIN EXISTING INDIVIDUAL NATION QUOTA FOR ENTRIES (NUMBER OF SLEDS PER NATION DOES NOT INCREASE IF A NATION WANTS TO ENTER A WOMEN'S DOUBLES IN THE GENERAL DOUBLES RACE CATEGORY).  
POINTS EARNED IN THE CATEGORY **WOMEN'S DOUBLES** WILL NOT BE APPLIED TO THE OLYMPIC QUALIFICATION FOR 2022, AS A SEPARATE WOMEN'S CATEGORY DOES NOT EXIST IN THESE GAMES.

*(LOGIC: THE NUMBER OF SLEDS ENTERED IN EACH **WOMENS ONLY** DIVISION WILL BE MINIMAL CURRENTLY AND VARY GREATLY RACE TO RACE AND COULD ADVERSELY AFFECT A FAIR SYSTEM FOR NOCS TO QUALIFY **ANY** DOUBLES TEAM IF POINT SYSTEMS WERE COMBINED FOR THE PURPOSE OF QUALIFICATION)*
